Scrum Master Course

Do you require the skills to guide, motivate and lead your Agile Project team and get them to collaborate in a synergistic manner? Then this Scrum Master course is for you!

By enrolling for one of our programmes, you will be taking the next crucial step towards gearing yourself for the digital revolution.In this era where data is regarded as the new oil, it is even more important to have the capability to transform raw data into an insightful and meaningful form, enabling more effective decision-making and facilitating business transformation.

At Moyo Hodari, we regard ourselves as astute data people. Our facilitators are experts in their respective disciplines. Apart from being exceptional trainers, they have vast experience in their respective fields of expertise. Our extensive knowledge of the intri- cate layers of the data world enable us to impart real understanding of how the entire data process works, before delving into thedetailed functionalities of a specific programme or system. This holistic approach to data training has elevated us to be a leading training facility.

Agile delivery has been on the rise as a trend in project management since the early 2000s, and is increasingly popular as an alternative to traditional project management methodologies, especially among software development and IT teams. Ultimately, Agile is a mindset informed by the values contained in the Agile Manifesto and the 12 Principles behind the Agile Manifesto. These values and principles provide guidance on how to create and respond to change and how to deal with uncertainty in today's technology-driven world! Scrum is a lightweight framework that can be implemented to help people, teams and organisations to generate value through solutions for complex problems.

Your Trainer is Andrea Roux, a true Agilist. She has over 2 decades of software development experience, spending the last decade as an Agile Champion for leading companies in South Africa. She strongly believes in adopting Agile ways of working to create a customer orientated business, motivated employees, and instilling a healthy high-performance culture of continuous innovation. She is an excellent communicator who can engage effectively with teams, managers and executives.

Andrea is a member of Scrum Alliance® and has the following credentials: Certified Professional ScrumMaster® (CSP®); Advanced Certified ScrumMaster® (A-CSM®); Certified ScrumMaster® (CSM®); Degree in Software Development.
